WEATHER TABLE,

For foretelling the weather through all the lunations of each year.

By DR. HERSCHELL, IMPROVED BY DR. A. CLARKE.

This table is the result of many years' actual observation; and though not absolutely reliable in all cases, yet will be found tolerably correct, being constructed on a due consideration of the attraction of the Sun and Moon, in their several positions respecting the Earth, showing what kind of weather will most probably follow the entrance of the Moon into any of the quarters.

If new moon, first quarter, full moon, or last quarter happens—

NEW YEAR.—The commencement of another year reminds us of the speedy flight of time. How swiftly our life is passing; how much of life's work is yet unaccomplished.

Last year's unsettled accounts should all be arranged promptly.

The leisure afforded by cold weather and long evenings, should be profitably spent in promoting mental and moral improvement, as well as in recreation. We may make our hearts better, and acquire much wisdom, by companionship with good books, and with virtuous friends.

Winter.]

JANUARY 31 Days.

5

The chopping or grinding of grain to be fed to stock operates as a saving of at least twenty-five per cent.

Young stock should be moderately fed with grain in winter, and receive generous supplies of long provender, it being essential to keep them in fair condition, in order that the formation of muscle, bones, etc., may be encouraged and continuously carried on.

Milch cows in winter should be kept in dry, moderately warm, but well-ventilated quarters; fed and watered three times a day; salted twice or thrice a week; have clean beds; be curried daily; and in addition to their long provender should receive succulent food morning and evening.

Full complements of tools and implements of husbandry are intimately connected with the success of the husbandman.

6 FEBRUARY begins on THURSDAY. [1866.]

THREE KINDS.—There are three kinds of men in the world: the Wills, the Wonts, and the Cants. The former effect everything. The others oppose everything. "I will" builds our railroads and steamboats; "I Won't" don't believe in experiments and nonsense; while "I Can't" grows weeds for wheat, and commonly ends his days in the slow digestion of bankruptcy.

In every forty years of a man's life, he has spent nearly six years of Sundays; in every seventy years ten. How little do we consider our responsibility!

A bit of soap rubbed on the hinges of doors will prevent them from creaking.

THE FARMER'S CREED.—We believe in small farms and thorough cultivation. The soil loves to eat as well as its owners, and ought therefore to be nurtured. We believe in large crops, which leave the land better than they found it—making both the farm and the farmer rich at once. We believe in going to the bottom of things, and therefore in deep plowing, and enough of it—all the better if with a sub-soil plow. We believe that the best fertilizer of any soil is the spirit of industry, enterprise and intelligence; without this, lime and gypsum, bones and green manure, marl or plaster will be of little use. We believe in good fences, good barns, good farm houses, good stock, and a good orchard. We believe in a clean kitchen, a neat wire in it, a clean cupboard, dairy and conscience. We firmly disbelieve in farmers that will not improve, in farms that grow poorer every year, in starved cattle, in farmers' boys turning into clerks and merchants, in farmers' daughters unwilling to work, and in all farmers who are ashamed of their honorable vocation.

A FEW MAXIMS FOR FARMERS.—I. The farmer who does not return to his fields a dressing more than equivalent to the crops gathered therefrom, is as unwise and thoughtless as he who would neglect to feed the horse that was to carry him on a journey.

II. The husbandman who obtains from a field not properly manured, a small yield of grain, when by sufficient manuring he might have obtained a large one, is selling his labour at half its value.

III. In all cases keep the best products of your farm, whether of

grain or stock, for your own use, that improvement in each may result therefrom. If three poor sheep will bring as much as one good one, keep the one and sell the three.

IV. Do not permit the remains of animal or vegetable substances to decay about your dwelling, but incorporate them with the soil or the compost heap, thereby securing the comfort and health of your family and adding to the attractiveness of your home.

V. Having things "near enough," often causes much trouble. The head-board to farmer A.'s cart was a little too short, but it was "near enough," consequently it came out in passing over a jolt, and with it half the potatoes. The keys to Mr. B.'s waggon thills were rather small, but they were "near enough"—so they worked loose, the thills came out and the waggon and horse got wrecked together in going down hill. It is better and cheaper in the end, to have things just right.

FARMER'S PAINT. Farmers will find the following profitable for house or fence paint: Skim milk, 2 quarts; fresh slaked lime 8 ounces; linseed oil, 6 ounces; white Burgundy pitch, 2 ounces; Spanish white, 3 pounds. The lime to be slaked in water, exposed to the air, and then mixed with one-fourth of the milk; the oil in which the pitch is dissolved to be added, a little at a time, then the rest of the milk, and afterwards the Spanish white. This is sufficient for twenty seven yards, two coats. This is for a white paint. If desirable, any color may be produced; thus, if a cream color is desired, in place of part of Spanish white, use the ochre,

TURKEYS.—As the best plan to raise turkeys, procure black turkeys, and teach them to be gentle before they commence laying. As soon as they begin to lay, take away their eggs; let their nest-egg be a hen's egg. When they have laid out their litter destroy the nest, feed them well, and in ten days or less they will generally commence laying again. Turn those they have laid once or twice a week. When they have laid the second lot, and want to set, let them have what eggs they can well cover, and put the balance of the first litter under a hen at the same time, or as near as may be, so that they will hatch nearly together. Take the young chicks from the hen and put them all with the old turkey, she will brood them all.

Save your suds for the garden and plants, or to harden yards when sandy.

MAY begins on TUESDAY.

[1866.]

If you get a moment to spare, spruce up—put the gate on its hinges, put a little paint on the picket fence you built last year, and make it cosy and inviting. Don't say you can't find time for these things. The fact is, you have no time to grow slovenly. Your property will sell for more money in the market, and be worth more to you at home, if you devote an odd hour now and then to sprucing up.

GREEN should be the prevailing color for bed hangings and window drapery.

ITEMS FOR HOUSEKEEPERS. Alum of vinegar is good to set colors red, green or yellow.

Salsoda will bleach; one spoonful is enough for a kettle of clothes.

A hot shovel held over varnished furniture will take out spots; or touch them with flannel dipped in alcohol, and rub till dry and warm.

Ribbons of any kind should be washed in cold suds and not rinsed.

A bit of glue dissolved in skimmed milk and water will restore rusty old crupe.

If flat irons are rough rub them well with fine salt, and it will make them smooth.

If you are buying a carpet for durability, you must choose a small pattern.

Ring Worm is cured by an application of castor oil and train oil in equal parts.

JUNE begins on FRIDAY.

[1866.]

WALKS.—Let any one doubting the value of hard-coal ashes for manure, try them for walks. Dig out the soil three or four inches deep, throw into the bottom any coal cinders, oyster shells, small stones, or other rubbish, for a foundation; then put on the ashes. Roll them, and the walk will be smooth, hard and dry. If this does not quite satisfy one's taste, let him just put an inch or two of fine gravel over the ashes, then roll smooth and solid. No wind will spoil such a walk, nor will it be muddy. It is the cheapest of good walks.

JUMPING.—To prevent cattle from jumping, chip off the eyelashes of the upper lids with a pair of scissors; as they grow again keep them short, and the ability or disposition of the animal to jump is as effectually destroyed as Samson's power was by the loss of his locks.

WHEN TO FATTEN BEEF.—A farmer of large experience says he fats his beef in summer, and only calculates to have them hold their own, and be ready for sale when the market suits him; and he calculates that four quarts of meal, with good pasturage in summer and early autumn, will make as much beef as eight quarts of new corn-meal, with the best of hay, in cold weather.

TO START A BAULKY HORSE. Fill his mouth with dirt or gravel from the road, and he'll go. Now don't laugh at this, but try it. The plain philosophy of the thing is, it gives him something else to think of. We have seen it tried a hundred times, and it has never failed.

General Dealers in all kinds of Groceries, . . . HALIFAX.

A SIMPLE mode of keeping butter in warm weather where ice is not handy: Invert a common flower-pot over the butter, with some water in the dish in which the butter is laid. The orifice at the bottom may be corked or not. The porousness of earthenware will keep the butter cool.

COLIC IN HORSES.—Dissolve one pint of salt in a pint of hot water; then add a quart of good vinegar, and pour half of this mixture down the horse's throat. If the horse is not well in half an hour give him the balance, and you will soon find him all right.

Summer J

JULY 31 Days.

Weeds should never be permitted to mature their seed on a farm, but be pulled up or cut down as often as they show themselves, such being the only effectual method of eradicating them. To insure this result the ground should be planted in corn, and that kept clean.

Time and labor devoted to the collection of materials to be converted into manure are the most fruitful sources of profit in the whole range of farm economy.

Every husbandman should carefully read and digest matters connected with his business; his success being as dependent upon a full knowledge of its principles and details, as is that of a lawyer or physician with a knowledge of its details.

All grain crops should be harvested before the grain is thoroughly ripe.

AUGUST begins on WEDNESDAY.

[1866.]

HORSES.—Do not over-drive in hot weather. Never allow a horse to drink when warm, unless he is to be kept moving as usual. Where they are stabled during hot weather, clean the stables often, litter well, and allow each animal to have a breathing hole in the window or wall before him, if possible. Some horses gall very easily beneath the collar and harness, during hot weather, where the parts do not fit well. Wash the wounds with clean water, and apply a paste made of white lead and linseed oil. Then provide a collar or harness that will not chafe.

POULTRY.—Drive turkeys, ducks and chickens to the meadows and wheat stubbles, that they may eat grasshoppers and caterpillars. A mixture of loppered milk and Indian meal is excellent for poultry grow and hens lay.

HARROWS.—Clean the points of the teeth, and if they must be left out of doors, let them stand on strips of boards, as rust often corrodes them nearly as much as usage wears them out.

APPLES, quartered and cored, sprinkled with sugar, and cooked in a close dish, in the oven, require less sweetening, and are preferable to those stewed in the ordinary way.

HORN PITHS.—Collect them at tanneries, and plow them in whole, where there is no mill to crush them. They are valuable fertilizers for any purpose.

FRUIT.—Handle carefully; one bruise rots an apple. Apples packed in barrels in dry leaves keep longer than packed in any other way we know, and will bear transportation better. Keep fruit in a cool place, but where it will not be frosted.

HOG PENS.—Pork cannot be fattened fit to eat in damp and dark apartments. Hog Pens should have the purifying influence of sun and wind.

SEPTEMBER 30 Days.

CHARCOAL FOR HOGS.—Hogs, when put to fatten, should be supplied with plenty of fresh earth. Their nature is to wallow. Pounded charcoal, if fed twice or three times a week, will be eaten freely. It corrects the stomach, and combines with the digestible properties of the food, and is deposited with it. Thus it adds to the weight and greatly to the solidity and flavour of the meat.

WAGGONS.—Keep all wheel vehicles in the shade during hot weather. If a tire is very loose, reset it. If loose but little, the fellos of nice wheels may be saturated with linseed oil, and wheels of ox carts and lumber waggons soaked in coal tar.

ORCHARDS. When the ground is not covered with a smooth turf, remove all brush and sticks, level with hoes, harrow thoroughly, put all the stones in close heaps, where apples will not fall on them and be bruised.

and Family Groceries, are the BEST and CHEAPEST.

A BEAUTIFUL EXPERIMENT.--If an acorn be suspended by a piece of thread to within half an inch of some water, contained in a hyacinth glass, and so permitted to remain without being disturbed, it will in a few months burst and throw a root down into the water, and shoot upward its tapering stem, with beautiful little green leaves. A young oak tree, growing in this way on a mantle-shelf of a room, is a very interesting object.

A VERY handsome climbing plant for the inside of a window may be grown from the English Ivy. Set a slip of the ivy in a pot of rich loam, and it will form a most delicate drapery of beautifully veined leaves all over the window-sash and casement.

A MINIATURE wheat field may be raised in doors by placing a flock of cotton batting upon a large tumbler or wide-mouthed jar filled with water, and scattering grains of wheat upon the batting. In a week the grains will germinate and shoot up their green spikes, making a beautiful crown of delicate foliage over the tiny field.

CURING MEAT.—One gallon water, 1½ lbs. salt, 6 oz. sugar, ½ oz. saltpetre, ½ oz. soda or potash. Boil well and skim. When cold pour over your beef or pork. Meat should stand for two days after killing before being cured—and when put away should be well covered with pickle.

PREPARATION FOR PRESERVING LEATHER.—Durability is ensured to harness and shoes by the following :—Twenty one parts of tallow, to which add three parts of rosin, and when melted mix well ; in another vessel seven parts of good soap dissolved in seventy parts rain water. When dissolved and heated to the boiling point, add to the other, and boil the whole gently, when it is ready for use.

LEAKAGE AROUND CHIMNEYS.—Coal Tar and Sand, made into a stiff paste, will effectually stop leakage, if the shingles are not too open.

SHEEP SKINS FOR MATS. Steep the skins in water, wash till they are soft and clean, scrape well the flesh side, lay in fermented bran for a few days, wash again, rub the flesh side repeatedly with a solution of salt and alum until well bleached, after which make a paste of salt, alum, wheat flour, and yolks of eggs, which spread on flesh side, stretch, dry, and rub with pumice stone.

A yellow carrot, scraped or grated, and applied as a poultice, will cure erysipelas, and will also cure croup. As the poultice becomes dry it should be changed.

By stabling and shedding stock through the winter a saving of one fourth the food may be effected; that is, one fourth less food will answer than when such stock may be exposed to the inclemencies of the weather.

POULTRY.—In frosty weather poultry require a greater quantity and a greater variety of food than when it is mild. Scraps of meat from the table should go to the fowls. Linseed meal promotes egg laying. It may be mixed to advantage with scalded meal or shorts. Hens like indian corn. Sunflower seed is good for them, and should be raised on purpose for feeding them. In the building where they are kept a dry earth floor is the best.

HORSES.—Corn meal, and about ten pounds of hay daily, with moderate exercise and proper grooming, will keep horses in good condition. Their stables should be light, clean, and moderately warm. Blanket a horse when he is standing out of the stable, or when he first comes in, and at night; too much blanketing is injurious.

TO PREVENT HORSES PULLING THE HALTER.—Tie a rope around the neck, put it through a hole in the edge of the manger, and tie it around the fore leg below the knee, and when the horse pulls, the rope will slip through the hole and pull up the fore leg, and he will give it up.

Wood ashes and common salt wet with water, will stop the cracks of the stove, and prevent the smoke from escaping.

BATTERY POINT—Entrance to Lunenburg Harbor.—A *fixed white light*

IRON-BOUND ISLAND LIGHT.—Off the entrance of LaHave River. A *bright flash light*, of ten seconds duration, followed by an eclipse of thirty seconds. The lantern is placed on a square wooden tower, painted *white* on the southern side of the Island, and is visible from all points of approach. Elevation seventy-five feet above sea level.

PORT MEDWAY.—A *fixed, white light*, on Admiralty Head, W. side of the entrance of the port. Building square, painted *white* with *black square* in the centre of seaward sides, forty feet above sea level, and stands within thirty fathoms of the shore.

LIVERPOOL.—South end of Coffin's Island. A *plain, revolving light*.

PORT POINT Harbor Light, at the head of Liverpool harbor, southern entrance of the river. A *bright, fixed light*, visible from all points of approach, and must be left on the larboard hand when entering the harbor.

RAGGED ISLAND Harbor Light—On Gull Rock, off the entrance of the harbor. Building square, and painted *white*, exhibiting a *clear, white light*, at an elevation of fifty-one feet above the sea level, and is situated in lat. $43^{\circ} 39' N.$ and long. $64^{\circ} 66' W.$

SHELBURNE—McNutt's Island. Two *fixed lights*, one above the other.

BARRINGTON—Baccaro Point, east side of the entrance to Barrington Bay. A *flash light* of fifteen seconds.

CAPE SABLE ISLAND.—On Cape Sable in the county of Shelburne. A *red, fixed light*. The building is an octagon, and is painted *white*.

SEAL ISLAND.—The first light on approaching the Bay of Fundy is on the south point of Seal Island. A *plain white light*, elevated about eighty feet above high water mark, and may be seen on approaching the Island from any point of the compass. A very dangerous rock, under water, but upon which the sea always breaks, called Blonde Rock, about three and one-third miles S. by W. by compass from the Light House. Between this rock and the Island there are some dangers: the ground is rocky throughout, and large vessels, therefore, ought not to attempt passing between them.

PUBNICO HARBOR LIGHT.—A Beacon Light on the S. E. side of the entrance to Pubnico Harbor, situate on the E. side of the entrance of the Bay of Fundy, about thirteen miles northerly of Cape Sable. Building square, painted *white*. A *fixed white light*, twenty-eight feet above high water level, (rise and fall 12 feet,) and stands fifteen fathoms from low water mark. The point of beach is bold.

YARMOUTH.—West side of the harbor. A *plain revolving light*.

A *Fog Bell* has been erected on the E. Cape of Yarmouth harbor, a few feet to the southward of the Light House, and about one and a quarter miles from the extreme outer point of the Cape. Strikes *seven* times per minute. But not in operation at night.

BRIAR ISLAND.—A *plain white light*, situate about half a mile N. E. from the N. W. point of the Island.

WESTPORT.—Peter's Island, at the South entrance of the Grand Passage. Two *white lights*, placed horizontally, to distinguish it from Briar Island Light, at an elevation of forty feet above high water mark.

DIGBY GUT LIGHT.—On the W. side of Digby Gut, from Briar Island north-eastward. A *fixed white light*.

LARD, CHEESE, BUTTER.

BOARS HEAD, Petite Passage—Exhibits *red and white flashes* at intervals of 60 seconds.

PORT WILLIAMS, (late Marshall's Cove)—*Two vertical white lights*, visible from all points of approach. Building square, painted *white*. Port Williams is distant from Digby Light House East 25 miles, and from Black Rock Light House West 17 miles.

MARGARETVILLE RED LIGHT—Building square and painted *white and black horizontal bands*. The Light is visible from all points of approach. Margareville is distant East thirty-seven miles from Digby Light House, and West 15 miles from Black Rock Light House.

The lights in the above Beacon Lights distinguish them from other lights in their vicinity.

BLACK ROCK LIGHT—On the southern shore of the Bay of Fundy. *A fixed white light*.

APPLE RIVER LIGHT—North side of the entrance to Apple River, in Chignecto, or Cumberland Bay. *Two fixed lights*, placed horizontally.

PATRIDGE ISLAND RIVER—An octagonal light beacon, on the W. side of the entrance to Patridge Island River, Parrsborough, on the N. side of the Basin of Minas, and exhibits a *plain white light*, at an elevation of thirty feet above high water; rise and fall about forty-five feet. The tower is *white*, and stands close to high water mark on the beach. Vessels can only enter the harbor at high water, and must lie aground on the soft bottom when the tide is low.

HORTON BLUFF LIGHT—In the Basin of Minas, ninety-five feet above sea level, high water; rise and fall forty or forty-five feet. Building square, painted *white*, stands sixty feet from the Bluff, and shows a *white light*, which may be seen in clear weather over the greatest part of the Basin of Minas, (after passing Cape Blomedon,) and above the Five Islands, and up Windsor River, until intercepted by the continuation of the Bluff to the southward of it.

BURNCOAT HEAD LIGHT, Basin of Minas—The lantern is erected on a square tower attached to the main building, and shows a *plain white light*, about 75 feet above high water level, and visible from all points of approach. Tower and building painted *white*. Bearings and distances: Cape Blomedon N. 70° , W. 26° 5', 10 miles. Brick Kilm Ledges N. 52° , W. 7° 5', 10 miles. Economy Point N. 36° , W. 3° 9', 10 miles.

DEVIL'S ISLAND—An octagonal building on the S. W. point of Devil's Island, at the entrance of the Eastern passage to Halifax harbor, and exhibits a *red light*, on the seaward sides, to distinguish it from Sambro and Meagher's Beach light; stands forty-five feet above high water mark; rise and fall six feet. The tower painted *dark brown*, with a *white belt* between the Balcony and Lantern, to distinguish it in the day time.

EASTERN BEAVER, OR WILLIAM'S ISLAND—*A white revolving light*.

WHITE HEAD ISLAND LIGHT—On the S. W. point of White Head Island. The tower is square, painted *white*, stands seventy-five fathoms from the water's edge, with an octagonal iron lantern, sixty feet above sea level at high water; rise and fall six feet. The light is distinguished by *bright flashes* of ten seconds duration, followed by eclipses of ten seconds, displaying alternately three flashes and three eclipses in a minute. The light will not be totally obscured during the eclipse.

CANSEAU, CRANBERRY ISLAND—*Two fixed lights*, one above the other.

GUYSBORO' HARBOR BEACON LIGHT—On the W. side of the entrance to the harbor, head of Chedabucto Bay. *A fixed light.*

ARICAT BEACON—A light on Point Morich, on the south-east side of the southern entrance to the harbor. Building square, painted *white*. *A white light*, thirty-four feet above the sea level.

EDDY, or SAND POINT LIGHT—On Eddy, or Sand Point, on the west side of the south entrance to the Strait of Canso, distinguished by *two white lights* placed horizontally, twenty-five feet above sea level. Building square, painted *white*, with a *black diamond* on the seaward side.

WEST SIDE OF NORTH ENTRANCE TO THE GUT OF CANSO—*A fixed white light.*

CAPE ST. GEORGE LIGHT, Antigonishe County—Building square, and painted *white*. *A revolving white light* at intervals of 30 seconds.

PICTOU HARBOR LIGHT—On the south-east side of the entrance to the harbor. *Two fixed lights*, vertical—upper one *white*, lower one *red*.

PICTOU ISLAND LIGHT—On the south-east point of the Island. Building square, and painted *white*. *A white fixed light*, fifty two feet above high water mark.

PORT HOOD LIGHT—Changed from *white* to *red*, when seen from the northern entrance, to distinguish it from Margaree and North Canso Lights.

SEA WOLF, or MARGAREE ISLAND LIGHT—Situate on the N. W. side of the Island of Cape Breton, nearly midway between Port Hood and Cheticamp Harbors, and distant from Cape Breton two and a half miles. *A plain white light*. The lantern is placed on a square wooden tower, painted *white*, near the centre and summit of the Island. The lantern is 298 feet above sea level—visible from all points of approach. To vessels in proximity to the Island the light may become obscure^d by the abrupt cliffs or sides of the Island, which may serve as a guide to tack or anchor by, as hundreds of vessels find anchorage on the south-east side. The chief building is near the south-east end, in shore, where a few fishing stages and boats are kept in use during the fishing season.

ST. PAUL'S ISLAND—*A fixed light* on the north-east end, and a *flash light* on the south-west end. Both *white lights*.

LOW POINT LIGHT—East side of Sydney, C. B. Harbor. *A fixed white light.*

FLINT ISLAND LIGHT—On Flint Island, on the eastern coast of Cape Breton, lat. $46^{\circ} 11' 5''$ N., and lon. $50^{\circ} 45' 20''$ W., and exhibits a *bright flash light*, every fifteen seconds, visible from all points of the compass. The light is sixty-five feet above sea level, and can be seen at the distance of twelve miles.

SCATARIE ISLAND—*A white revolving light* at the east end of the Island.

LOUISBURG—On the east side of the entrance to the harbor. *A fixed light.*

GANNET ROCK LIGHT—This light is intended to warn vessels of their approach to a very dangerous range of shoals and ledges, which extend from the Old Proprietor to the Seal Islands of MacInias, a distance of about twenty miles. *A white flash light*, twenty seconds dark, and forty seconds light, in each minute. Building painted in stripes, *vertical, black and white*. Between the northernmost and southernmost of the Murr Ledges, there is a range of dangerous rocks and shoals, many of them *almost* above water, and extend eastward from the Light House about four miles. From this range further *southerly*, about six miles

best in the City—Lots of 6 lbs. at 2s. 4d. per lb.

from the Gannet Light, lies a dangerous breaker called the Bull—this may be avoided by keeping three remarkable headlands near the S. W. end of Grand Manan open.

MACHIAS SEAL ISLAND LIGHT—Two *fixed white lights*, upon the Machias Seal Islands, forty-five feet above high water, and bearing from each other E. S. E. and W. N. W., distant about 200 feet, by which circumstance of two Light Houses at the same station, they will be immediately distinguished from all other lights upon the coast, British or American. Both buildings painted *white*. Vessels standing to the northward between these lights and the Gannet Rock, should tack or haul off the moment they bring these lights into one, as they will be then not more than three-fourths of a mile from the Murr Ledges, if not more than five miles to the east of the light.

SWALLOW TAIL POINT—Grand Manan Island.—A *fixed white light*, at an elevation of about 150 feet above high water, may be seen from 17 miles. Pyramidal tower painted *white*. Lat $44^{\circ} 45' 52''$ N., long. $66^{\circ} 44' 4''$ West of Greenwich.

HEAD HARBOR LIGHT—Next in order after passing Grand Manan and the plain white light (American) on West Quoddy Point, is Head Harbor Light, placed on the N. E. extremity of Campo Bello, and is a guide to vessels entering the main channel to West Isles, Moose Island, and the Inner Bay of Passamaquoddy; it enables vessels also at all times to enter Head Harbor. A *fixed white light*. Building painted *white*, with a red cross on it.

POINT LE PREAU LIGHT—Upon this projecting head-land two lights are placed, one above the other, in the same house, and distant twenty-eight feet. Both lights are seen from every point of the compass where they may be useful. Both are *fixed and white*. Building painted *white* and *red*, in stripes, five feet broad each, horizontally.

PARTRIDGE ISLAND LIGHT—At the entrance of the river and harbor of St. John, N. B. A *fixed white light*. The building painted *red* and *white*, in vertical stripes.

BEACON LIGHT—Within Partridge Island, and upon a spit or bar which extends about half a mile south of Sand Point, and which dries at two-thirds ebb, stands the Beacon Tower. A *fixed white light*. Building painted *white* and *black* in stripes vertically.

QUACO LIGHT—A *revolving white light*, placed on a small rock, off Quaco Head, showing twice full and twice dark in a minute. The light can be seen from any quarter where a vessel can approach. Building painted *white* and *red*, in horizontal stripes.

CAPE ENRAGE LIGHT—On a point of that name in Westmoreland, nearly opposite Apple River Harbor, N. S. Building painted *white*, and about 120 feet above the tide mark. A *plain white light*.

WEST QUODDY LIGHT—This is an American light, placed on the west side of the entrance in the St. Croix, by Lubec and Eastport.

A Light House has been erected on **CAPE RACE**, Newfoundland. A *fixed white light* from sunset to sunrise. The light is visible to seaward from N. E. by E. round by the S. E. and S. to W., and is elevated 180 feet above mean water level of the sea, and may be seen in clear weather 17 miles from a ship's deck. The tower is striped *red* and *white* vertically. It stands close to the location of the old beacon, which has been cut down. The Lighthouse is in lat. $46^{\circ} 39' 19''$ N., long. $53^{\circ} 2' 28''$ W. Bearings magnetic. Var. 24° W.

Building, a circular stone tower, faced externally with fire brick of a light color.

Signals will be given at or near each of the above four light houses by means of an air or fog whistle, sounded at short intervals during foggy weather and snow storms, or by a nine pounder gun, fired every hour, in case of the whistle being out of order.

Selection of FAMILY GROCERIES—*Cheap for Cash.*

EXPLANATION OF SIGNALS

Made on the Flag Staff at Citadel Hill, when vessels are seen or reported from an Outpost.

One ball close up,	1 sq. rigged.	A pendant under a ball, 6 sq. rig'd.
One ball half hoisted,	2 do.	do. over a ball, 7 do.
Two balls close,	3 do.	do. under 2 b'ls close, 8 do.
Two balls separated,	4 do.	do. between 2 balls, 9 do.
A pendant of any col.	5 do.	A flag of any color, 10 or more do.

The above balls, &c. are hoisted on the east or west yard arm, according to the *quarter* the vessel first appears in.

When vessels are reported from an outpost, the following signals are shown under the yard arm as repeats.

For a square rigged vessel, two balls of a size, one at the outer, the other at the inner halliard, close up.

A ship or a Barque, a large ball at the end of the yard, with a small one at the inner halliard.

A Brig, a small ball at the end of the yard, with a large one at the inner halliard.

A Brigantine, a cross close up to the outer halliard.

Two or more Brigantines, a cross half hoisted.

An upper yard having been added to the Ship Staff, it will be used exclusively to designate Steam Vessels, thus:

One ball East or West indicates a Steam Vessel repeated in that quarter.

A small ball out and a large one in, a Branch Packet or a Merchant Vessel.

A large ball out and a small one in, a Man-of-War Steamer, or Royal Mail Steamer.

Numbers will be indicated as directed from the lower yard.

The lower yard is now used for sailing vessels only.

When the description of vessel in sight is ascertained from the Citadel, the following descriptive colors will be hoisted at the mast head:

A Union Jack, Flag Ship.

Do. with a red Pendant over it, a two decker.

Do. with a blue Pendant over it, a Frigate.

Do. with a blue and white Pendant over it, a Ship or Barque rigged Sloop-of-War.

Do. with a white Pendant over it, a Brig-rigged Sloop-of-War.

Do. with a red and white Pendant over it, a Schooner or Cutter-of-War.

A white Pendant, with two blue crosses, a Transport or a vessel with troops on board—if a Man-of-War, the Union under.

A white Pendant with a blue ball, a steamer—if a Man-of-War, the Union under.

A red flag pierced white, Royal Mail Steam Packet from England.

A blue and red flag crossed white, do. from Boston.

A white and blue Pendant, do. from Newfoundland.

A white and red Pendant, do. from Bermuda.

A blue Pendant, a Ship.

A blue and white Pendant, a Barque.

A red Pendant, a Brig.

A red and white Pendant, a Brigantine.

HALIFAX CITY RAILROAD.

OFFICE 91 UPPER WATER ST.,; MANAGER, WM. D. O'BRIEN, ESQ.

This public convenience will come into operation for freight and passenger traffic on the 1st of May 1866. Rate of fare by ticket, 6½ cents, without ticket 7 cts. Rate of freight will be from 25 to 50 per cent. under previous rates. The speed both of passenger and freight cars will be 6 miles per hour. Route will be from Depot at Richmond, through Upper Water St., Granville, George, Hollis, Morris, and Pleasant Streets to Freshwater Bridge, returning through the same streets. Freight and baggage will be carried not only over the route indicated, but also through the entire of Lower Water Street. Passenger cars will continually move over each line, at intervals of ten minutes, from 6 A. M. to 10 P. M. The rails will offer no obstruction to vehicles of any kind, but will rather have the effect of restoring order to traffic, by involving the necessity of all vehicles keeping on the left hand side of the street, as will the cars in their progress in either direction.

THE SINGER SEWING MACHINE.

Our Letter A FAMILY SEWING MACHINE is fast gaining world wide reputation. It is beyond doubt the cheapest and most beautiful of all Family Sewing Machines yet offered to the public. No other Family Sewing Machine has so many useful appliances for Hemming, Binding, Felling, Tucking, Gathering, Guaging, Braiding, Embroidering, Cording, and so forth. No other Family Sewing Machine has as much capacity for a great variety of work. It will sew all kinds of cloth, and with all kinds of thread. Great and recent improvements make our Family Sewing Machines most reliable and most durable, and most certain in action at all rates

of speed. It makes the interlocked stitch, which is the best stitch known. Any one, even of the most ordinary capacity, can see, at a glance, how to use the Letter A Family Sewing Machine. Our Family Sewing Machines are finished in chaste and exquisite style.

The Folding case of the Family Machine is a piece of cunning workmanship of the most useful kind. It protects the machine when not in use, and when about to be operated may be opened as a spacious and substantial table to sustain the work. While some of the Cases, made out of the choicest woods, are finished in the simplest and chastest manner possible, others are adorned and embellished in the most costly and superb manner.

It is absolutely necessary to see the Family Machine in operation so as to judge of its great capacity and beauty.

It is fast becoming as popular for family sewing, as our Manufacturing Machines are for manufacturing purposes.

The Branch Offices are well supplied with Silk, Twist, Thread, Needles, Oil, &c., of the very best quality.

To the Farmer who wants to clothe his sons and daughters, and "men servants and maid servants," economically, the Family Sewing Machine will prove indispensable. There are no persons more in want of Family Sewing Machines than the Farmers of America. Next in importance to the feeding of a family, comes the clothing of a family. The farmer uses labor-saving machines to cultivate and harvest his crops. If he does this to get bread, why not use the best labor-saving Sewing Machine to clothe his family? There is as much economy in one case as the other, and if the Farmer has a big family, more too.

FOR CONSUMPTION it is the only reliable remedy known. It has, in thousands of instances, restored patients that seemed past hope of recovery, and in tens of thousands, has arrested the disease in its primary stages, and restored the patient to robust health.

BRONCHITIS.—Its effects in this troublesome disease are very marked. It is necessary to persist in its use for a considerable length of time. FEMALE DEBILITY.—To sustain and augment the vital forces; to make new, rich, and pure blood; to build up the nervous system; to restore energy to the mind and body—nothing can be better adapted than this preparation. In ASTHMA, GENERAL DEBILITY, EMACIATION, COUGHS, it is a reliable remedy. Nineteenths of the cases where it is supposed to fail, simply arise from the remedy being abandoned before its beneficial effects become obvious. Be careful and get the genuine, manufactured only by

A. B. WILBUR, CHEMIST, 166 COURT STREET, BOSTON.

DR. WARREN'S BILIOUS BITTERS,

FOR PURIFYING THE BLOOD, CURING LIVER COMPLAINT,
JAUNDICE, HEADACHE, DIZZINESS, DYSPEPSIA,
GENERAL DEBILITY, COSTIVENESS, PILES,
AND ALL BILIOUS DISEASES.

For Cleansing, Strengthening, Invigorating and putting in Order the Weak, Run Down, and Debilitated and diseased Human System, it is believed to be unequalled by any other Medicine in the World.

A GREAT REGULATOR

Persons suffering from a combination of diseases of a chronic nature, and cannot tell "exactly what ails them," will find sure and speedy relief in the use of Dr. Warren's Bilious Bitters; it restores the lost appetite, regulates all the functions of the body, cleanses the blood, carries off all morbid and unhealthy secretions, thereby preventing or curing diseases of the skin, and all complaints caused by impure blood, or a disordered condition of the Liver, Stomach, and Bowels. To the weak and emaciated, Dr. Warren's Bilious Bitters are particularly recommended as the most perfect Tonic and Invigorant the world has ever seen. Beware of counterfeits and imitations. Observe a fac simile of the signature of the Proprietor, (JOHN A. PERRY,) over the cork of each bottle, without which none is genuine.
